

BUILD A BIRDS NEST SHOP

GETTING STARTED...

A bird's nest shop is a great way of inviting our feathered friends into our neighbourhood. They are always looking for the best supplies for their nests, so why not help them out and make a shop with natural materials?

Dried leaves, twigs and bark are the best materials to include as they are easy to use and will make the bird very happy to come and visit! So let's get going!

WHAT TO DO...

1. Collect some materials from around your neighbourhood to put in your Birds Nest Shop.
2. An old bird house is the perfect structure to hold all your supplies and easy to hang outside. You can also make this as colourful and decorative as you like... so get creative, the birds will LOVE it.
3. A mesh cylinder is the perfect way to house your materials and is easy for the birds to access the supplies. Don't forget to cut up some hair from your hairbrush to add to your bird's nest shop supplies!
4. Once stuffing all your materials in the cylinder, place the cylinder sideways in the house, making sure there are no sharp edges.
5. You can hang your Birds Nest Shop on your balcony, in a tree in your backyard or somewhere in your neighbourhood.
6. Now sit back and watch your customers roll in!

TOP TIP!

Invite your bird customers to your shop by leaving some bird seed near your bird's nest shop!
