

BUILDING A BEE HOTEL

WHAT YOU'LL NEED:

1. A container for the hotel. This can be any old mugs, jars, clean cans or cylinder containers you can around the house
2. Hollow bamboo sticks that can be cut down to the size of your container
3. Arts and crafts! You can decorate your bee hotel any way you like: paint, string, wire, fabric, you can even make your hotels look like a bee!

WHAT TO DO:

1. First collect all of your recyclable materials.
2. Start by adding the hollow bamboo sticks into your bee hotel, packing them in tightly for all the bee's little rooms.
3. Now, get creative! Decorate your bee hotels: paint it your favourite colour, wrap string around to make it stripey or even make some bee wings out of wire!
4. Find a perfect spot for your bee hotel in the garden:
 - Near some bee friendly flowers so they can snack on some nectar
 - Up high but secure in the branches
 - Somewhere it can catch some cooler morning rays and be protected from the hot afternoon sun

Make your bee hotel bright and colourful to attract bee guests!

EXTRA SPECIAL!

Maybe like Jett, you'll want to add some googly eyes!
Don't forget to do the googly eyes dance!
