

## **Statement from the Gold Coast City Council**

**The Gold Coast Building Certification Group (GCBCG) issued the Q1 Building a Certificate of Classification in 2005 (7 years ago). Approximately 4 years ago there was a complaint made to the Building Services Authority (BSA) about the Mechanical Ventilation in a part of the Q1 Building and since then the GCBCG, BSA, Sunland Group and the Queensland Fire & Rescue Service have been working collaboratively to rectify the subject of the complaint.**

**The content of the latest compliance report has been discussed by all agencies and documentation for the specific works has been submitted to GCBCG. GCBCG is currently considering the submission and the relevant compliance report. Certification is expected following consultation with the key stakeholders and agencies. Sunland Group is scheduled to commence work and it is expected that all work will be completed and final approval issued within 4 months.**
