

## Getting Started:

Get spooky in the garden by creating your very own carnivorous plant paradise!

- Pick out your carnivorous plants
- 1 low wide terracotta pot
- 1 smaller terracotta pot
- 1 terracotta saucer
- Superglue
- Sand
- Perlite
- Coir Peat
- Fine Bark
- Rain or filtered water

**Top Tip!**  
Get extra spooky  
by adding spooky  
decorations to  
your

## What To Do:

1. Glue the saucer to the base of the larger terracotta pot. Then place the smaller pot into the larger pot
2. Mix one part sand, one part perlite and two parts coir peat together with a bit of fine bark.
3. Half fill the outer ring around the smaller pot with the soil mixture and arrange your spooky plants!
4. Once you're happy with the placement, take them out of their pots and fill the remaining space with soil.
5. Give them a big drink of rain or filtered water and fill the reservoir in the middle with water.
