How to make a container garden

1

Drill some holes in the bottom so that the roots don't get soggy. You'll need a big person to help with that.

2

Popping some pebbles or stones in the bottom will also help with drainage.

Now it's time to get grubby! Add some dirt to your container.

3

It's time to plant. With this little plant, you can pop it into the dirt, newspaper pot and all!

4

Now water your little plants to help settle them in. Be sure to keep the soil moist but not soggy, so that your plants can grow.
