

## Getting Started:

**Seeds! How good are seeds!**

**Now you can source your own seeds to share with the community.**

- Native fruit/plants found around your area
- Paper towel
- Paper envelope
- Pens and markers

**Top Tip**  
Source seeds from plants local to your area!

## What To Do:

1. Cut open your fruit and scoop out the flesh onto a paper towel, separating the seeds from the pulp
2. Leave in the sun to dry out
3. Decorate some envelopes while you wait for your seeds to dry
4. Once they've dried out in the sun, fill up your envelope and add to your seed swap library!
