**Quotes attributable to a Victorian Government spokesperson**

*“The Metro Tunnel is the biggest change to Melbourne’s rail network in 40 years - transforming the way thousands of Victorians move each and every day.”*

*"It's important Victorians understand how this new tunnel works, how it connects into the existing network, and what it means for their daily journeys - which is why we make no apologies for communicating with Victorians where they get their news including through print, TV, radio and social media."*
