24/11/2019	n the meantime \$ 47E(c) and \$ 47E(c) have suggested a meeting for Thur 5th December between 6-7pm. Are others interested? \$ 47E(c) has offered to arrange a meeting room for sydney people. i can do the same for melbourne people. do we want this meeting to be a phone hookup or just face-to-face?	s 47E(c)
24/11/2019	Phone hookup would be good for those not in Sydney or with a tight window to make the time. I'm in.	s 47E(c)
24/11/2019	Thanks all who've organised this.	s 47E(c)

2/12/2019	Does anyone know the best person within the ABC to speak to about our travel policy regarding paying the carbon offsets for flights? Is there specific policy that anyone is aware of? Just wanting to build an argument for company wide offsets for ABC employee flight bookings. I just went and calculated (and paid) my own offsets for all my ABC related flights in the last 18 months and 20 x return flights (3770kg of CO2) came to \$49. I'd love to be able to pass this info on to the right people if anyone has suggestions?	s 47E(c)
2/12/2019	I'd attend this Thursday in Melb. Thanks for organising.	s 47E(c)
3/12/2019	great question S 47E(c) - i'd start by asking your unit administrator if they know who is best to speak to. if you have no luck I'd ask David Anderson directly.	s 47E(c)
3/12/2019	General I've booked Conf Room Melbourne MR201 on Level 2 for Thursday 5 December between 6-7pm if anyone wants to participate.	s 47E(c)

3/12/2019	Would anyone be interested in booking a screening of that film from s 47E(c) in Melbourne?	s 47E(c)

4/12/2019	Hi S 47E(C)  I was hoping to attend but it is going to be too late for me as I have to be across town by 7pm. I'll stay posted for outcomes!. S 7(2)	s 47E(c)
4/12/2019	I'd attend, (and would be happy to help organize for in the new year? )	s 47E(c)
4/12/2019	Sorry I can't make it as rather sadly NSW is on bushfire alert again with another tough long day expected . Keen to hear outcomes.	s 47E(c)

4/12/2019	Where have we got w tomorrow's meeting? Do we have enough folks to make it worthwhile?	s 47E(c)
5/12/2019	The follow up sounds like a good idea S 47E(c) - I'm keen to attend but if there's only a handful of us then it might be better to wait for the new year.	s 47E(c)
5/12/2019	Agreed who is around in January?	s 47E(c)

5/12/2019	I'm around from the 13th onwards	s 47E(c)
5/12/2019	I'm back from jan 11	s 47E(c)
5/12/2019	Thanks S 47E(c)  Are you coming to the meeting tonight? If so, it would be great to discuss it then. From what I could find on the intranet of our environment policy, it looks like it was written in 2010 and if that's the case, I'd imagine it's a good time for us to be putting pressure on management to update it.	s 47E(c)
5/12/2019	Hi S 47E(C) no sorry I can't come tonight, but hoping we can arrange something in Ultimo soon. Was also surprised to see how old the environment policy is. I suppose there is a possibility that the ABC is paying carbon offsets, so would you like me to find out and then we can take it from there?	s 47E(c)
5/12/2019	That would be great to do some digging on it - I've sent an email to the travel department asking what the policy is specifically to flight offsets, but I'd like to find out what our overall strategy is as well. If you have a contact you could find out some more info from, that would be great!	s 47E(c)
5/12/2019	@team $\odot$ 47E(c) his 47E(c) - Conf Room Melbourne MR201 on Level 2 for Thursday 5 December between 6-7pm if anyone wants to participate i honestly don't know how many are attending. i booked this time to accommodate you and $\odot$ 47E(c) but if there's no other interest and you can no longer attend I'm happy to cancel. We can always wait until the new year, when we will hear more from $\odot$ 47E(c) and $\odot$ 47E(c) about some forums which are being organised. I might send out one final email to see if anyone's coming and cancel if I don't hear back. Thoughts??	s 47E(c)
5/12/2019	I'm around then too so if there aren't enough of us around to make tonight let's tentatively say Jan 15?	s 47E(c)
5/12/2019	If it doesn't happen tonight, then I could do the 15th	s 47E(c)
5/12/2019	Climate Crisis Solutions Group Meeting in Melbourne scheduled for this evening is deferred to Jan 15th unless there is an overwhelming preference for another date. If it's just a few of us we can always just go over to s 47E(c) for a beverage and very informal gtk.	s 47E(c)
5/12/2019	Thanks can you send through any dot points for those of us in other places <a href="https://statics.teams.microsoft.com/evergreen-assets/skype/v2/smile/20.png">https://statics.teams.microsoft.com/evergreen-assets/skype/v2/smile/20.png</a>	s 47E(c)
5/12/2019	I will call in. Can you send out dialin details pls?	s 47E(c)

5/12/2019	Hi \$ 47E(c) I agree that's a good question. I've just looked at our travel, environment and corporate responsibility policies and there's nothing specific in them, but the last two both talk about our environmental footprint and our responsibility to keep finding ways to minimise it. I'd be really happy to take it up with the CFO but it's your observation, so let me know if you'd rather write to her yourself, or to be included in anything I write etc?	s 47E(c)
6/12/2019	Cool - will see if I can come down for it from bendigo, if I can't any notes / dot points would be appreciated	s 47E(c)
6/12/2019	Does anyone know where the spreadsheet is for story ideas?	s 47E(c)
6/12/2019	s 47E(c) seeing as the meeting didn't go ahead are you still keen to help organise this for Jan or Feb?	s 47E(c)

6/12/2019	Apparently it costs for someone to find your address that way but it's cheap and easy to do so if there's some asshole climate denier out there ready for a fight I wouldn't put it past them	s 47E(c)

17/12/2019	I've just asked my conservative brother what he thinks of the film. I'm sure he'll tell me at Christmas! I think the refugee angle is a new way of looking at the consequences that could have impact. The comparisons with how Australia mobilised for WW2 and the US acted to prevent a nuclear disaster during the Cold War are powerful.	s 47E(c)

14/01/2020	Australia's fires have pumped out more emissions than 100 nations combinedThe situation: The wildfires raging along Australia's eastern coast have already pumped around 400 million metric tons of carbon dioxide into the atmosphere, further fueling the climate change that's already intensifying the nation's fires <a href="https://protect-au.mimecast.com/s/WBj8CQnzoZCNBvXqlxAxuz4?domain=technologyreview.us11.list-manage.com">https://protect-au.mimecast.com/s/mSLCROAp2fgn4GlC9QG2Q-?domain=technologyreview.us11.list-manage.com</a> .  In perspective: That's more than the total combined annual emissions of the 116 lowest-emitting countries <a href="https://protect-au.mimecast.com/s/oNcCCVAGwgfP0q2KSGEV_oO?domain=technologyreview.us11">https://protect-au.mimecast.com/s/oNcCCVAGwgfP0q2KSGEV_oO?domain=technologyreview.us11</a> . list-manage.com. It also adds up to about three-quarters of Australia's otherwise flattening greenhouse-gas emissions <a href="https://protect-au.mimecast.com/s/lpbFCWLJxkSyzr6Yi6OwYUJ?domain=technologyreview.us11.listmanage.com">https://protect-au.mimecast.com/s/lpbFCWLJxkSyzr6Yi6OwYUJ?domain=technologyreview.us11.listmanage.com</a> in 2019. Although it isn't an unprecedented amount at this point of the year in Australia, emissions are way beyond typical levels in New South Wales, where this year's fires are concentrated.  A vicious feedback loop: Rising temperatures and decreasing rainfall dries out trees, plants, and soil, amplifying fires when they break out. In turn, these huge fires are fueling climate change. 	1.A climate science speaker series has been organised by Ed Pols/Science/Weather and the first takes place tomorrow in Ultimo. Staff will be hearing from scientists from both CSIRO and BOM, and will have an opportunity to ask questions. The topic for the first session will be 'What does a 1 degree increase in temperature look like?'. The second in the series is hopefully taking place in Melbourne in a couple of weeks. Both sessions will be recorded for viewing on the intranet. s 7(2)
