

Getting Started:

Music is all around us! You can find it in the garden, or when you're munching on a carrot. Now you can turn your carrot into a clarinet!

- 1 Large carrot
- 1 Small carrot
- Drill bit
- Knife

Have an adult help you when using the drill bit and knife

What To Do:

1. Cut off the top of the carrot and, using a drill, hollow out the core
2. About 2cm from the top of the carrot lengthways, cut 1/3 of the way down. You should see the blade of the knife at the top of the cavity. Then, move down another 2cm lengthways and slice at an angle down the bottom of the cut.
3. Cut your smaller carrot so it's the same length as the top cavity, and cut $\frac{1}{3}$ off lengthways on an angle creating the mouthpiece.
4. Time to make the finger holes! Space out 3-4 points along the carrot and drill a cavity, making sure not to drill all the way through
5. Start a band with your friends!
