

**Statement from Australian Retirement Trust:**

Australian Retirement Trust (ART) acknowledges that some members may wish to invest according to an extended set of environmental, social and governance principles in addition to those considered across our other available investment options, so we offer our Socially Conscious Balanced Option (SCBO).

The SCBO's holdings in Australian and International shares will exclude direct investment into companies that exceed specified screens outlined in the [Super Savings Investment Guide](#).

Included in the screens (exclusions) applied to this option's Australian and International share asset classes is the exclusion of direct investment in companies that derive 5% or more of gross revenue (reported or estimated) in the most recent financial year of reporting from "extraction and production or refining of oil and gas".
