

Stencil Snowflake

To create a Stencil Snowflake you will need: black paper, white paper, scissors-warning, sponge and different coloured paint.

Step 1
Fold your piece of white paper in half. Then fold it in half again. Now fold it into a triangle. At the wide end of the triangle cut the edge into a semi-circle shape. Along the edges of the folded paper cut shapes like triangles and semi-circles.

Step 2
Unfold the paper and place it on the black piece of paper. Keeping the white paper still paint over the holes.

Step 3
When the paint is dry, pick up and rotate the white paper so that no paint can be seen through the holes. Paint the holes using different coloured paint.

Step 4
When the paint is dry, rotate the paper again and paint the holes with a different colour. When it is dry peel off the white paper.

Try using different shapes and colours
