

INGREDIENTS

Red apples
Edible paint

APPLE CRABS

1. Cut two sides of a red apple about half a centimeter from the center.
 2. Slice one side into 8 wedges to form the legs.
 3. Trim the two sides of the center, removing any seeds.
 4. Stack the pieces to cut symmetrical triangles for the claws.
 5. Place the remaining apple half on top to create the body.
 6. Use edible paint to add eyes for a more realistic look.
- If you don't have paint, you can use the seeds instead!
