## Quoll Farm

Into the wild with Tasmania's most elusive marsupial

*Quoll Farm* is a visually stunning, emotionally resonant documentary that explores the secret lives of Eastern quolls on a remote Tasmanian farm. Filmmaker Simon Plowright captures rare, intimate footage of this endangered marsupial, blending authentic wildlife storytelling with a personal journey of coexistence and conservation.

With a rich orchestral score and cinematic beauty, this film offers a compelling narrative of resilience and hope and is premium natural history content with global appeal.

'Has a gentle conservation message, and like... *My Octopus Teacher*, there's a story of human redemption as part of the wildlife package'

'Simon Plowright... (has) a voice MADE for nature docs, rivalling the godfather of them all, Sir David himself'  
– The West Australian

## Killer Whale: Australia's Megapod

Nature's most intelligent predator revealed

Narrated by acclaimed actor Richard Roxburgh, *Killer Whale: Australia's Megapod* explores the lives of a powerful orca community off the remote coast of Western Australia.

With access to leading marine scientists and cutting-edge technology, this documentary reveals the pod's complex social structures, hunting strategies and communication styles, including a distinct 'Aussie accent'. Neuroscientists in New York examine the orca brain, uncovering emotional depth and cultural behaviours.

This visually stunning and scientifically rich film offers a compelling insight into one of nature's most intelligent predators.
