Gary you will need to commence consultation locally and I would suggest the quicker the better..I thought you already had as Peter in fact asked me today if you were.....a camera policy will take too long.given ARCPAP and others all use cameras for obseration may I suggest you formulate a LOP like they have in the interim whilst the larger corporate aspects are dealt with...Clearly the dept is not going to go to the extent of funding this and have the same work practices remaining..... as you indicated in your brief there are over expenditure issues that will be picked up by this initiative.....clearly you had something in mind when you did the costings on how you see it working.....the precedent is set with others.....better it becomes an issue before they are fitted than afterwards..... I go for it.....

) cheers

Hello Maria

with the prospects of this job being completed possibly by end of February - we will need to finalise a SOP on constant observation as I feel I will get some resistance from local PSA as this will take away overtime from them.

Gary

Sorry I was in Port Augusta yesterday and have only got to this E-mail now.

Status is that Charles Tomas, when he returns from leave next Tuesday is to arrange a trial of both Fixed and Pantilt cameras to assess which is the best to install. Once decision is made he will cost the project and we will get funds approval to proceed. Procurement of the four cameras will only take a few days, but
