Re: Apology to Gregory Andrews

On 11 October 2017 I was interviewed on Radio National about the status of biodiversity conservation in Australia. During that interview I made some comments about the then Threatened Species Commissioner Gregory Andrews in relation to his opinions on Australia's biodiversity in general, and the prevalence of Leadbeater's possum in particular.

I sincerely apologise for those comments and regret any upset they may have caused.

Yours sincerely

Professor David Lindenmayer AO
